

**TÄNK
BAR**

Our expertise is to amplify brain power and facilitate thought processes. We therefore design methods, means and environments that make it much easier for individuals with different personalities, cultures and professions to think together, develop common abilities and interact in action.

This is required in all contexts when solving problems, managing operations, learning new things, improving methods and developing new concepts.

We offer this know-how through a thinking craft concept - TänkBar

<https://tankbarbysweden.se/en/tankbar/>

TänkBar [ˈtænkˈba:], a Swedish term / expression with several parallel meanings:

- a bar where you think together
- mentally possible to have an idea
- conditions that make it easier to think

In a TänkBar we offer the guests a chance to use all their senses and an opportunity to see, touch and gather around visual and tactile symbols for what they think of. In this way, they can more quickly distinguish important patterns and make new associations while absorbing a greater amount of knowledge.

In a TänkBar they can simply be much faster and smarter when they borrow each other's brains while producing both knowledge, concepts, strategies and action plans.

We quickly set up a TänkBar there and whenever it's needed, whether it's at a conference, in a workshop, at an event, in a course or in the everyday working environments.

Common for all settings of TänkBar is good coffee, visual props, tangible thinking tools and a creative usage of the room.

To make it short - we offer better conditions for action ability by thinking agility.
